About As

We produce for you with our belief in organic agriculture and our respect for nature. We are working harder every day to deliver the healthiest, most natural and highest quality products to you with the organic projects we carry out with our farmers. We carefully process the unique seeds grown in Turkey and present them to you. We are looking for perfection as a PANACEA ORGANIC by controlling this whole process with our traceability system at any time. Our aim is to become a permanent and stable, world-class, respected organization in its sector by increasing its customer portfolio and profitability day by day without sacrificing quality. We believe that this is through the best quality raw materials and products. We are ready to supply the product you want at the right time and price.

Black Cumin Seed Oil

Black cumin, which we obtain from our organic projects, is cold-pressed. No heat treatment is applied. Thus, there is no deterioration in nutritional values. Our product does not contain any additives, it is one hundred percent pure and natural. Black cumin grown in our country contains high levels of different phytochemicals such as thymol and thymoquinone. We have organic and conventional production.
